you for this, and for all the links.
12:17:56 From brenda to All panelists : mind blown!
12:18:07 From Mary Nations : typically we use power as ability to influence
and willingness to be influenced
12:18:17 From Allison Titcomb, UWTSA : A fast and interesting overview of
uses of HSD perspectives and tools.
12:18:39 From Mary Nations : that is, share power...to the extent possible for
engagement

12:25:00 From brenda to All panelists : I have found that I need to actually
change that word Identity to the thing that is bringing this group together such as
shared
12:25:33 From brenda to All panelists : shared goal. the word identity seems
to create some assumptions that may be hard to get past.
12:26:54 From Chris Corrigan : Also diversity is essential to increase your
ability to scan a complex landscape for outliers and positive deviance.

Quarterly miniconf 21Mar19 chat

12:27:22 From Chris Corrigan : The more diversity you have within the container, the deeper your capacity for sense making is.

12:28:17 From brenda to All panelists : new power

12:29:06 From brenda to All panelists : I am using that last chat as a quote from you Chris. is that ok.

12:29:19 From Cathy Toll to All panelists : I used this model to discuss teacher leaders' ability to influence classroom equity among their peers in K-12 education. It was well-received and I appreciated Mary's permission to use it!

12:30:47 From Gregoria Smith to All panelists : Thank you, Mary. Model looks great.

12:31:38 From Mary Nations to brenda, All Panelists : thanks Brenda!

12:32:47 From brenda to All panelists : are there other resources to read about experiences in using this in evaluation and assessment?

12:37:17 From brenda : I am setting up a change to medical education assessment program. I can see using this there.

12:37:24 From Chris Corrigan : Much more thinking on equity and evaluation here: <https://www.equitableeval.org>

12:37:46 From Stewart Mennin : Hi Brenda

12:38:01 From brenda to All panelists : Hi!

12:38:52 From Chris Corrigan : You're welcome! Very helpful to think about GE applied to this evaluation focus. What was the response at AEA in terms of simplicity of use?

12:39:02 From Stephen Bosacker : Helping a community learn to practice this could be very helpful in framing and planning community development.

12:39:10 From brenda to All panelists : Seeing if we have considered each of these elements in particular sharing power. this is always a sticky problem in our assessment program.

12:39:26 From brenda to All panelists : apologies for thumb type errors.

12:39:29 From Janice Fingler to All panelists : This can help to nurture "knowledge flow" in the science field. Mining has mineral exploration as a part of it, which is "evaluative", in its core approach - but current practices (power structures) appear to be shifting to more controlling - with best intentions. - impacting agility of the actual system we work in.

12:39:32 From Laura Williams : Have you thought a lot about the interaction between the 3 elements? We talk about C's affecting D's, affecting E's....have you explored how that relates to GE?

12:39:45 From hoffie : Brenda, will be interested in how you use this model in mediclaeducation assessment

12:40:01 From Laura Williams : :-) Thanks!!

12:40:11 From Stewart Mennin : Hi Hoffie, yes, we three could chat this together at another time.

12:40:18 From brenda to All panelists : yes

12:40:28 From Curdina Hill to All panelists : I can also see it being used in planning a facilitation around social justice issues. Curdina Hill

12:40:36 From Stephen Bosacker : Thank you! I want to learn so much more about this!

Quarterly miniconf 21Mar19 chat

12:40:37 From Janice Fingler to All panelists : Thanks ! - many threads there to explore.

12:41:17 From marcianation : Thanks! Lots to think about in my evaluation practice. Looking forward to learning more at AEA.

12:41:50 From Gregoria Smith to All panelists : Hi, Wendy!

12:41:51 From Mary Nations : Always happy to talk with folks about generative engagement - that is how I learn more and more! feel free to reach out - mary.nations@gmail.com

12:42:04 From Janice Fingler to All panelists : will do Mary !

12:42:09 From kimbraidwood to All panelists : I use these questions of GE in strategic planning . As many don't realize deciding who they will include is also a question of who they're not including

12:42:51 From Allison Titcomb, UWTSA : Chris-- People seemed able to "get it" rather quickly, and appreciate the visual as a way in AND recognize that it the tip of the iceberg and that it would take time to work with it and understand it more.

12:43:01 From Michael Pealow : I can see using this model when working with clients who have tendencies to be insular but who really need to be engaging with diverse perspectives. In other words, helping the client with some self-awareness as a starting point, before designing any sort of process.

12:43:33 From Mary Nations to Curdina Hill, All Panelists : thanks for mentioning that, Curdina - happy to explore that further with you as I am keenly interested as well

12:43:51 From Chris Corrigan : Thanks Allison..one often things I appreciate about HSD is that the tools can often be very straightforward ways to get people to put their hands on complexity concepts and begin working with them. I'll take this with some colleagues into practice and see what we learn.

12:45:19 From Mary Nations to kimbraidwood, All Panelists : great application!

12:45:33 From Jennifer Jones-Patulli : CAS, <https://www.hsdinstitute.org/resources/complex-adaptive-system.html>

12:46:08 From bartonk1 : I love the idea of co-creating leadership - just been working on this with a group, we used silence too and it was very potent! Thank you
